

Weekly Task Planner for Software Testing Career Growth (While Working Full-Time)

 **Goal:** To upskill in software testing while working 9 AM–6 PM, and become job-ready in 6 months

Repeat Every Week (Monday to Sunday)

Monday to Friday

Time	Task
6:30–7:30 AM	Optional: Light exercise + English listening/speaking (YouTube app)
7:30–9:00 PM	Manual Testing / Selenium / Postman learning (alternate days)
9:00–9:30 PM	Practice: 2–3 real interview questions + revise notes

 **Focus:** - Week 1–2: Manual Testing + Resume Writing - Week 3–4: Selenium + TestNG basics - Week 5–6: API + SQL practice

Saturday Plan

Time	Task
9:00–10:00 AM	Revise full week's concepts
10:00–12:00 PM	Practice: Write 1 test case + 1 test script in Selenium
2:00–4:00 PM	GitHub push + Resume/LinkedIn updates
6:00–7:00 PM	Apply to 10–15 jobs on LinkedIn/Naukri

Sunday Plan

Time	Task
9:00–10:30 AM	Mock interview (self or with friend)
11:00–1:00 PM	Mini project work (login test, form validation, API test, etc.)
5:00–6:00 PM	Job follow-up or research new companies
8:00–9:00 PM	Plan next week + Journal progress

Weekly Goals Checklist

- ☐ Complete 3–4 hours of Selenium practice
 - ☐ Write 1 new test case (manual)
 - ☐ Push at least 1 test to GitHub
 - ☐ Apply to minimum 30 jobs
 - ☐ Do 1 mock interview (verbal or written)
 - ☐ Improve 2 things on Resume or LinkedIn
-

 *Tip:* Don't wait to be perfect — stay consistent. Even 1 hour daily makes big difference!
